	Total		_____

Please indicate the date you need the tags to arrive by ____ / ____ / ____ (date)

OR the date you would like to schedule MBN staff to come to your ranch ____ / ____ / ____ (date).

Service Option Descriptions:

Option 1: MBN will provide electronic identification tags and upload source and age data into a private database. An on-site audit of your calving records is required to complete the verification. Carcass data collection will not be attempted on these animals.

Option 2: MBN will provide electronic identification tags and upload source, age, and other production data into a private database. MBN staff will work closely with the producer, feeder, and packer to track calves in order to collect carcass data. Producers choosing this option have a responsibility to communicate with MBN staff regarding the sale and destination of cattle and should understand that although every effort will be made to collect carcass data, no warranty or guarantee has been or can be made to ensure receipt of such data.

Things To Remember:

- All ranches must complete BQA Certification.
- Tags will be allocated to your ranch. No sharing with neighbors. If you need extra tags, we can send you more.
- On-site audit of calving records and cattle must happen before cattle leave your ranch.

All checks should be made payable to MSU.
